

112 學年度高中部英文作文比賽

1. Title: "The Impact of AI Chatbots on Human Life: Challenges and Personal Strategies"

Instructions:

In recent years, Artificial Intelligence (AI) has taken the world by storm. AI, particularly in the form of chatbots like ChatGPT, has the ability to engage in conversations with humans, explain complex concepts, create presentations, generate text, and even produce comics or illustrations. However, as AI capabilities continue to grow, concerns have arisen about the potential for AI to replace human jobs. Please write a composition of at least 500 words to explain both of the benefits and the drawbacks of using ChatGPT in human life and its far-reaching implications for the future. Additionally, how can individuals adapt to this evolving landscape?

2. 比賽時間：13:10~14:50，共 100 分鐘。

3. 不得使用任何形式的字典與電子載具，其餘依本校考試規定辦理。

As the evolution of advancement of technology impacts the world, the contemporary society has demonstrated a significant progress of how humans can do to ameliorate the status quo, as well as bring more convenience into human lives. With the increase of demand in assistances in various aspects, people nowadays have been developing a sense of reliance on technology, particularly, Artificial Intelligence. Worthy of mention, the utilization of AI can considerably range from casual usages to vital applications, since the prevalence of it has allowed the associated industries to thrive in diversity. Amidst all the services and functions Artificial Intelligence may provide, the existence of chatbots gained immense popularity, particularly in recent times. Possessing a machine that is able to adapt to instructions quickly, along with abundant information sources, chatbots like ChatGPT not only provides users a brand new vision but also becomes an indispensable factor attributed to the improvement of our modern society, thereby arousing more expectations for Artificial Intelligence's further potential.

Frankly speaking, as a student who has received a considerable amount of assistances from ChatGPT, it does enhance my working efficiency and thus help me achieve things that are impossible for me to finish solely on my own. Undoubtedly, it has brought convenience to its users, as it will attempt to implement every instructions, while users can communicate with the chatbot timely and by simply inserting words in the chatbox. Distinctive from other technological applications such as hardware instruments or robots, one of the critical reasons that tempts people to use ChatGPT is its design, technically, how it functions. Incorporating the traits of an online classroom and the form of text messaging, ChatGPT allows all kinds of people to have a taste of Artificial Intelligence, but in a very

(more space in the back)

that doesn't involve any complexity or overwhelming complications. In the past, technological inventions derived from traditional techniques require users to possess a certain extent of associated knowledge in order to make further operations. As a result, people who excel at using technological products are either the ones who are familiar with technology due to frequent usage, for example, adolescents that have known how to use their phones since they were small, or professional experts in related fields. However, with a tidy distribution of its page, and a simple way to ask for assistance, ChatGPT enables people to develop a novel way to participate in the modern era and thus experience the marvel of Artificial Intelligence, regardless of every individual's background, ability, or even different ages. Embodying the objective of satisfying people's demands, ChatGPT provides literally all forms of assistance. From solving academic issues to organizing schedules, from offering the sense of amusement by telling jokes to analyzing users' problems and sentiments, it exhibits the ultimate breakthrough of boundaries and the social stigmas humans hold against technology.

Nonetheless, when it comes to the discussion of the negative implications ChatGPT has generated, the arousal of controversies is inevitable. Despite common concerns regarding safety and privacy, the majority of people shift their focus to the aftermath of overusing ChatGPT. For instance, more and more students have been using ChatGPT for the completion of academic works and examinations, which contradicts with the core value of learning. Furthermore, business workers have been asking ChatGPT to draft documents or reports for them, notwithstanding the fact that the database of ChatGPT may be inaccurate. If these types of circumstances continue to emerge in the future, it is ^{indeed} possible to lead to the decline of trust and confidence established in people, as well as more inappropriate usages of technology.

After all, humans contribute to the evolution and the advancement of technology. It may be difficult to adapt to new alterations and the significant changes in the way of living. Nevertheless, if humans possess the awareness of not relying on technology too much, or to utilize it excessively, and to take the potential implications of it into consideration, it can might as well lead to the reduction of the cons of it. With that being said, the most

appropriate resolution to adapting to and engaging in the fast-changing world without handicaps in my opinion, is to preserve and acknowledge your genuine self and your natural abilities, and merely ask for an adequate amount of assistance from all forms of technology.
