

112 學年度高中部英文作文比賽

1. Title: "The Impact of AI Chatbots on Human Life: Challenges and Personal Strategies"

Instructions:

In recent years, Artificial Intelligence (AI) has taken the world by storm. AI, particularly in the form of chatbots like ChatGPT, has the ability to engage in conversations with humans, explain complex concepts, create presentations, generate text, and even produce comics or illustrations. However, as AI capabilities continue to grow, concerns have arisen about the potential for AI to replace human jobs. Please write a composition of at least 500 words to explain both of the benefits and the drawbacks of using ChatGPT in human life and its far-reaching implications for the future. Additionally, how can individuals adapt to this evolving landscape?

2. 比賽時間：13:10~14:50，共 100 分鐘。

3. 不得使用任何形式的字典與電子載具，其餘依本校考試規定辦理。

As technology development and mechanics improved year by year, human has invented robots with exceptional intelligence. AI chatbots are one of the most significant invention in recent years, have undoubtedly expanded the world's vision in regard with how artificial intelligence could interfere our lives in all aspects. These chatbots' extraordinary capability allows them to come up with outrageous ideas that human brain can hardly think of. If we utilize AI chatbots wisely and precisely, it will genuinely become our best secretary in daily lives. However, in other words, as AI chatbots gradually invade our lives, we must realize its potential threat on bearing our biggest enemies.

AI Chatbots simply break over the limits of human brain. While being able to cope with complex demands, they can organize millions of information from the web in a few seconds. Surprisingly, they are able to defeat by artistic or creative tasks, while they are flexible enough to produce illustrations with a better sense of beauty. In addition, businesses and enterprises can benefit from AI chatbots in almost every detail of their work. Ranging from financial management, marketing strategies, or even the most simple mission such as sorting information, the efficiency bursts in all departments.

Although most occupations profit from the AI chatbots, we shouldn't rely its convenience unlimitedly. AI chatbots complete missions with better quality than human does, in other words, certain jobs are

(more space in the back)

going to be replaced since the employers tend to choose the most economical methods. AI chatbots are no doubt a better option in comparison with spending thirty-eight thousand RMB per month to hire an employee with relatively worse efficiency. On the other hand, creativity that originates from emotions may disappear as we take advantage of AI chatbots convenience, allowing them to take over works we are supposed to do.

In the future, over 70% of the presented jobs are faced to be erased from our lives. Take a day in my life as an example. First, the being clerks in 711 are going to be replaced by AI chatbots since their intelligence surely allows them to add up the bills. Next, teachers are headed to the same fate, while AI chatbots could explain complex concepts that teachers failed to explain clearly. Many of jobs that required intelligence are going to fall victim to the AI chatbots.

In order to confront the potential invasion of AI chatbots to our lives, we must recognize the significance of sentimental activities. For instance, most jobs in the artistic industry convey emotions to audience by being relatable in their performances. AI chatbots certainly won't be able to substitute the actors of a TV drama, while they will never be able to express feelings that are mutual with the public. As a result, the value of emotions indeed have the strength to beat the AI chatbots.

In conclusion, apart from the existed advantages, we must utilize the AI chatbots wisely, or else we definitely are going to fall victim to this invention.
